SDG-Indicator 16.7.1 b and c

OEC-D-UNDP-UNODC WORKSHOP ON MEASURING ACCESS TO JUSTICE THROUGH SDG 16

OCTOBER 13TH, 2021

INGVILD A. FLØTRE
DIVISION FOR LABOR MARKET AND WAGE STATISTICS
INGVILD.FLOTRE@SSB.NO
Agenda

Data sources

Population

Disaggregation

The SDG-indicators
Data sources

• No need to go outside of Statistics Norway.

• Two different data sources;
  ◦ Register-based and the Labor Force Survey (LFS).

• The register-based data’s main source is “a-ordningen”.

• Merge the data from “a-ordningen” to other registers.

• Use the LFS to report numbers on individuals’ disability status.
Population

- Age groups;
  - Register-based: 15-74 years, LFS: 15-66 years

- Everyone who lives in Norway with:
  - at least one-hour work per week or temporary absent.

- Classifications;
  - Sector-coding, SIC 2007 (industry), ISCO-08 (occupation)
Disaggregation

• No problems reporting overall numbers.

• The challenges occurred when the disaggregation started.
  ◦ Confidentiality and lack of data

• Disaggregate on:
  ◦ Sex, age group, disability status (only for b) and population group (immigration status
    – 2 (for indicator c) or 3 (for indicator b) groups ).

• Total numbers for “Judges” and “Registrars”.
  ◦ Not able to disaggregate among level of courts.
The SDG-indicator b)
