12 NSO to tailor the list of government-issued identification documents in this question to their national context and include only those in use in the country, and for which citizens actually need to file an application. For instance, national identity cards may not exist, or voters’ cards may simply be mailed to a person before voting, etc. Depending on the national context, other relevant ID documents that could be added include permanent resident cards and citizenship cards. Where there is a relevant migrant subpopulation, the listing of documents should include those that are specific for this group (i.e. residence permit, etc.)

13 NSO to replace ‘civil registration services or other relevant agencies’ with the name of the particular agency(ies) responsible for issuing such identification documents in the country.

**INTRODUCTION TO THE MODULE: READ TO THE RESPONDENT (Illiterate)**

I am going to ask you a few questions on disputes that you have experienced in the past two years, meaning since (insert an event of national relevance that is common knowledge for most of the population) until now.

<Ask all>

* AJ1. I am going to read you a list of problems and disputes that people commonly experience in everyday life. Please only include problems that you have had yourself – not problems experienced by a business you run or in the course of self-employment or as an employer, and not situations where you represented or helped somebody else with their problem. Please only mention problems once.

In each case, can you tell me whether you have personally experienced such a problem in the past two years, by which I mean a problem that started since <<MONTH YEAR>> or started before then, but continued afterwards?

28 Such informal mechanisms are to be added if their role is (usually) officially recognized by authorities. Amend wording and examples to fit national characteristics. To be decided by the national implementing partner.

29 List to be completed by national implementing partner. Police and medical services must remain in first two positions and must be included by default. Among informal competent authorities, please consider mechanisms in public and private institutions for addressing these situations (e.g., offices of internal affairs or internal disciplinary control).
VIOLENCE REPORTING (VR)

16.3.1 Proportion of victims of violence in the previous 12 months who reported their victimization to competent authorities or other officially recognized conflict resolution mechanisms

<<Mandatory items included above as VR1-1A, VR2-2A, VR3-3A, VR4-4A, VR5-5A>>

National revision of items for nonreporting is encouraged (between response items 20 and 76), maybe to add further typical reasons, if applicable.

Additional optional items for contextualization may include, for the last incident of violence of all types:
- the clarification if the victims talked about the incident with anybody else other than competent authorities (such as family, social networks, specialised services – for example specialised NGOs, etc.
- satisfaction with the authorities’ response, including if the victim would recommend other victims to report a similar offence to a competent authority
