The SDG 16 Survey: Support to Data Collection on Peace Justice and Inclusive Institutions

Lessons and next steps from piloting the SDG 16 Survey in Kenya

By: Renice Bunde
Kenya National Bureau of Statistics

18th February, 2022
Introduction

• **Pilot Survey Mode:**
• **Target:** Persons age 18 years and above
  - One individual from each of selected households
  - Only usual members of households
• **When:** 2\textsuperscript{nd} to 8\textsuperscript{th} August, 2021
• **Where:** In Nairobi City County and Kiambu County (Both Urban and Rural)
• **How:** Using computer assisted personal interview (CAPI) with an in-built quality assurance system (Survey Solutions)
  - Transmit the information via internet to the KNBS central servers
  - No proxy interviews were allowed
  - Sampling was done without replacement
• We Contextualized the questions given by UNDP/UNODC/UNHCHR where necessary
  
  **Sample Size:** 500 Individuals; 35 households per cluster;
  
  **Survey Sample Frame:** NASSEP V Household Frame
Lessons Learnt

From the Modules:
• The average time taken to administer the questionnaire was 40 minutes which is manageable
• There was a feeling that some questions should be reduced and some questions especially those meant for probing made the respondents to feel bored
• Very few cases of human trafficking
• Others found giving bribes to be normal
• There was general shyness among some of the respondents when asked questions about sexual violence due to:
  • Age differences between them and the interviewers though it did not affect the response rate
  • Some cultures taboos which do not allow conversations about sexual
Lessons Learnt

**Training:**
- The training was done two months prior to the data collection.
- Enough time should be allocated for training and practice before the team moves to the field.

**Translation and Interpretation:**
- The translation was done in English and Swahili which was a good practice.
- Some concepts and terminologies were difficult to understand in both languages including local language like the sexual orientation.
KNBS is planning to conduct:

- Victimization Survey
- Governance Peace and Security Survey

Administrative Data:

- Planning to collect data on reported cases of human trafficking and other modules
